

PhoenGap3.4 android 环境安装教程

学习要点:

- 1. 安装前准备工作
- 2. 安装 node.js
- 3. 安装 phonegap3.4 运行 helloword
- 4. 安装插件
- 5. 配置启动项等

phonegap2.9 安装视频教程地址

http://bbs.phonegap100.com/thread-174-1-1.html

一、安装前准备工作

1、下载 java JDK 1.6 以上版本

http://www.oracle.com/technetwork/java/javase/downloads/jdk7-downloads-1880260.html

2、下载 Android Development Tools

已经包括了Android sdk、esclipe,解压即可使用。

https://developer.android.com/sdk/index.html

2、设置系统变量

Java 环境变量配置完成以后(也就是 java javac 运行成功以后)还需要额外配置的东西如下

系统变量 Path 后面添加:

- D:\Program Files\ADT\sdk\tools;
- D:\Program Files\ADT\sdk\platform-tools;
- D:\Program Files\ADT\sdk\eclipse\plugins\org.apache.ant 1.8.3.v201301120609\bin
- 4、更新自己的 android sdk 到 4.4 以上版本(不然会出错)
- 5、注意 ANT 目录不能是中文 不然编译不成功
- 6、分别输入 java javac ant 看是否配置环境成功

运行 java 成功

运行 javac 成功

ant 成功

```
C:\Users\<del>J...i.mee</del>2>ant
Buildfile: build.xml does not exist!
Build failed
```

二、安装 node.js

下载地址:

http://nodejs.org/

下载完成安装 node.js

三、安装 phonegap3.4

打开命令窗口 运行

npm install -g cordova

```
C: Wsers \5
                   >npm install −g cordova
npm http GET https://registry.npmjs.org/cordova
npm http 200
            https://registry.npmjs.org/cordova
npm http GET
            https://registry.npmjs.org/plugman/0.20.2
            https://registry.npmjs.org/elementtree/0.1.5
npm http GET
            https://registry.npmjs.org/plist-with-patches
            https://registry.npmjs.org/mime
npm http GEI
             https://registry.npmjs.org/optimist/0.6.0
            https://registry.npmjs.org/underscore/1.4.4
npm http GET
            https://registry.npmjs.org/request
npm http GET
npm http GET
            https://registry.npmjs.org/q
            https://registry.npmjs.org/shelljs
npm http GET
             https://registry.npmjs.org/npmconf
npm http GET
            https://registry.npmjs.org/tar
npm http GET
             https://registry.npmjs.org/xcode/0.6.6
npm http GET
            https://registry.npmjs.org/semver
            https://registry.npmjs.org/elementtree/0.1.5
npm http 304
npm http 304 https://registry.npmjs.org/plugman/0.20.2
npm http 304 https://registry.npmjs.org/plist-with-patches
npm http 304
            https://registry.npmjs.org/optimist/0.6.0
npm http 304 https://registry.npmjs.org/underscore/1.4.4
npm http 200
             https://registry.npmjs.org/mime
npm http 304
            https://registry.npmjs.org/tar
npm http 304
            https://registry.npmjs.org/npmconf
npm http 200 https://registry.npmjs.org/shelljs
npm http 304 https://registry.npmjs.org/semver
   http 200 https://registry.npmjs.org/request
npm http 304 https://registry.npmjs.org/xcode/0.6.6
npm http 200 https://registry.npmjs.org/q
```

cordova create hello com.example.hello "HelloWorld"
cd hello
cordova platform add android
cordova build

cordova run android 运行模拟器

使用 eclipse 工具打开并编辑该项目

File>New>Project>Android>Android Project from Existing Code 选择则刚才建立项目所在路径,即可使用 ADT 打开进行编辑。

四、安装 删除 插件

cordova plugin add org.apache.cordova.device

安装对应的 device 插件

cordova plugin list

列出已经安装的插件

cordova plugin remove org.apache.cordova.device

删除 device 插件

五、配置启动项
